Abstract

Sand Man Token intends to be a decentralized financial technology ecosystem where the intrinsic value is derived from a series. Series themselves have the power to communicate ideas, build communities through humor, content, art, and story and connect all people around the world and beyond as a sort of common interest. They spread virally and act as an inspiration forming something of a decentralized cult-like movement. A series can instantly convey more information than any other medium.

On this solid intrinsic value uniting all of civilization, Sand Man Token will build its financial infrastructure because the foundation of all finance must be universally shared and unshakable. There is no vehicle to achieve this quite as powerful as the internationally recognized and popular series Sand Man.

With a focus on series, the focus is also on ordinary people, not just billionaires, corporations, and governments. We aim to provide average people around the world with a way to participate in the DeFi economy, learn about exciting new DeFi technology, and profit from it in various ways through our cryptocurrency ecosystem.

Background

Sand Man is now free from the prison he has faced for 105 years. Now he has set his journey to get rid of all corrupts and shit coins from the market. He is going to restore his kingdom where everyone is going to benefit from his DeFi kingdom.

Our team is excited to bring you Sandman Token, the new cryptocurrency created by a diverse group of well-skilled individuals from around the Globe to become the KING of all altcoins. On our expedition to the crown, we will operate with integrity, transparency, and respect for our community. Sandman Token will host a variety of utilities that will recognize individuals' notoriety and status on the blockchain.

Sand Man will be the catalyst into an unbelievable journey in the DeFi world! We want to make this journey as fun and exciting as possible. Holders can expect numerous benefits, full-on transparency, and lastly, RESULTS!

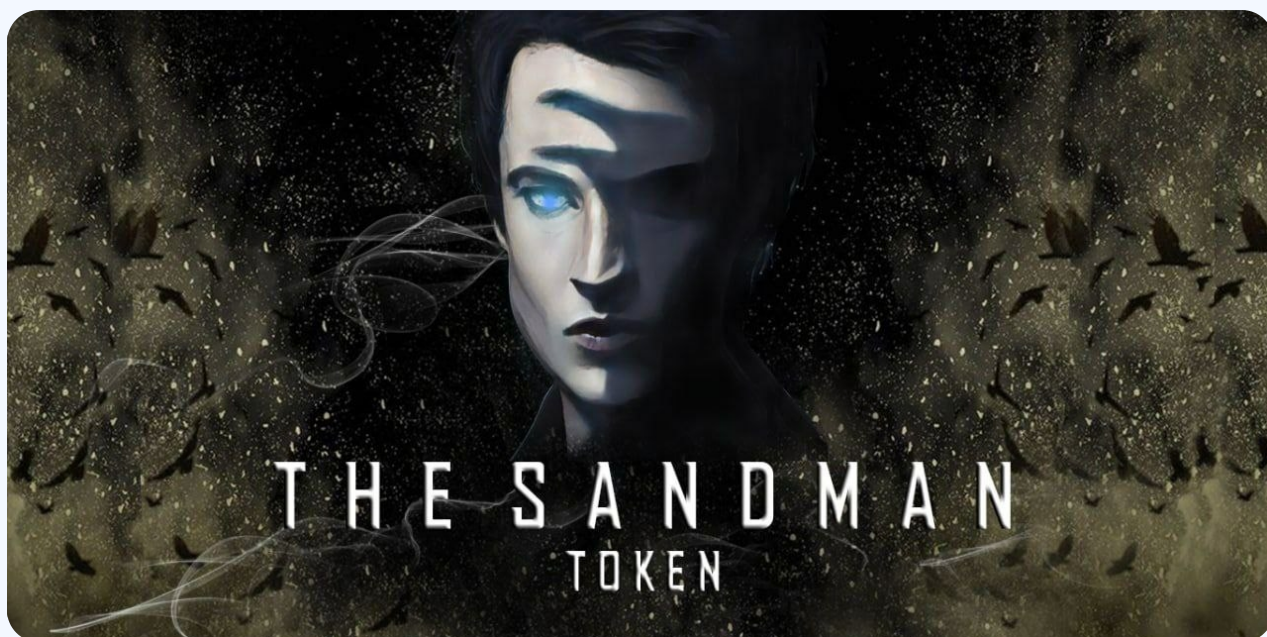

Sandman Token

The consensus is that cryptocurrency is the way of the future. Many individuals have been interested in the growth and utility of cryptocurrency for years. Binance introduced Smart Contracts, which provided a whole new dimension to the platform.

Sandman Token is a new “altcoin” token on the BSC Network, with a real expert team, ready to genuinely take on the biggest altcoins, such as “Doge” and “Shiba Inu”. With our Fair Launch philosophy, expert marketing tactics targeted advertising campaigns, and a focus on providing a truly “authentic” experience to holders - we aim to project from day one initial liquidity state, past \$100M market cap, all the way to the top market-cap lists.

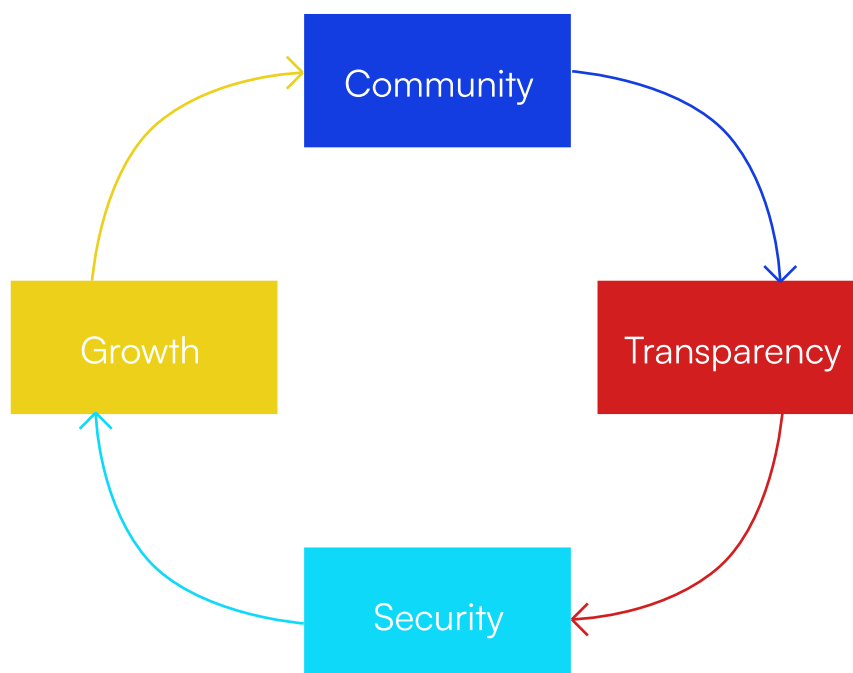

Sandman Token will be a true value token that will benefit from social-driven price increases over time through clever and targeted marketing. The market capitalization does not lie! Alt stocks and coins have seen explosive growth, so much so that large venture capitalists are designating time and funds to understand this phenomenon.

Sandman Token

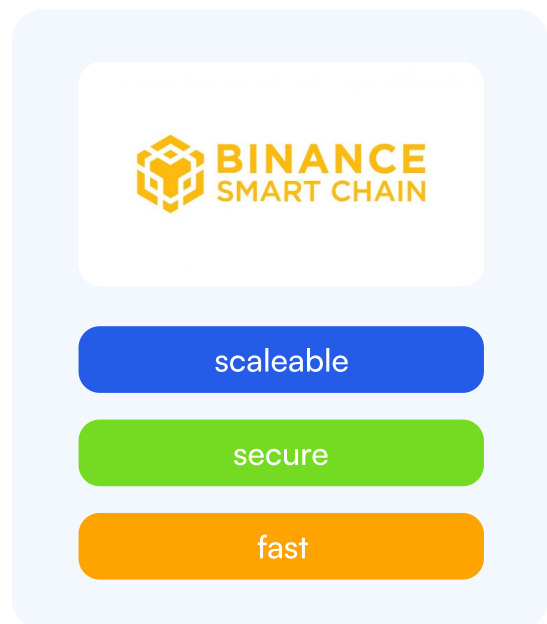

As with other “altcoins”, Sandman Token aims to facilitate increased liquidity by using in-built ‘tokenomics’ functions in the contract, that provide traders and general coin investors with a deflationary asset, burning a percentage of the circulation, and generating self-serving marketing funds with every transaction.

Sand Man was created with the idea of having a community where everyone can get a “place at the table”, and enjoy this thrilling market with like-minded people. We are still at the beginning of cryptocurrency; in fact, less than 5% of the world population uses crypto at the moment of this writing. Thus, there is major room for growth and learning.

Binance Smart Chain

Binance Smart Chain (BSC) was developed as a means of utilizing solidity-based smart contracts with much greater speed and efficiency than other, competing chains. With decentralized exchanges on BSC offering lightning-fast swaps and extremely low fees, BSC has started to become one of the most widely used blockchains for Decentralized Finance (Defi). It's a sovereign blockchain, which will provide security and safety to all users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance dApps that require a fast and smooth user experience. It's EVM-compatible and will support all of the existing Ethereum toolings along with faster and cheaper transactions.

Its on-chain governance with Proof of Staked Authority consensus, built on 21 validators who validate the transactions, will provide decentralization and enable significant community involvement.

Tokenomics

Transaction Tax Distribution

• 5% Marketing

• 2% Buyback

• 3% Liquidity Pool

• 1% Dev

Tokenomics

Buy-Back

Tokens can invest in themselves through a buyback. The proportion of shares owned by holders increases as the number of tokens on the market is reduced. 2% will be utilized in the Buy-Back with every transaction for \$SANDMAN keeping the user's benefits in mind. Buy-Back Features also:

- ➔ Gives investors more confidence to buy tokens.
- ➔ Buy-Back also improves the decentralization of tokens.
- ➔ It increases the demand for tokens.
- ➔ Because of that token becomes bullish.

Liquidity Pool

Another aspect of \$SANDMAN is automatic LP. By adding the tax to the token's transaction overall liquidity can be improved, this addition to LP produces stability from the supplied LP, so raising the token's overall LP and supporting the token's price floor. This differs from other reflection tokens' burn function, which benefits only in the near term from the supplied supply reduction. The auto-liquidity for \$SANDMAN is set at 3% per transaction and will be transmitted to the auto liquidity pool.

Our Values

Community

We believe the community is, and always will be the core of this project. Our community is dispersed around the world. Our series is viral and worldwide. As we continue to grow, people from different countries will become a part of this project. Every step we will take will benefit the community.

Inclusion

Our community offers a place for everyone. We do not tolerate any form of discrimination. We welcome people of any background, race, religion, gender, and orientation. People with any level of knowledge are welcome. We invite you to come as you are and contribute how you can, this project will continue to be a community-driven effort.

Transparency

At Sandman, we believe in decentralization and we are moving in that direction. Every decision is made with the community in mind.
